Integer-J scan; different matched priors
CSI NMSE (dB)
DMA configuration uses J; all tones, budget varies
narrow validation (32)
narrow frozen test (100)
wide validation (32)
wide frozen test (100)
-10 dB recovery gate
Wideband frozen test: all 13 controls near 0 dB
CSI NMSE (dB)
DMA configuration uses J; J x Kp = 128 RE
distinct
repeat
interleaved
-10 dB recovery gate
